BVS

Brihaspati Vidyasadan

With the mission to explore potential of individual students and promote excellence in all walks of life, BVS endeavors to be the +2 School of first choice imparting quality education and nurturing humanistic values.

Started 33 years ago, to combine the demand for quality education with international exposure yet conforming to the norms and values of the sanatan ways, BVS has continued to grow to be prominent education provider in Nepal.

Today BVS is redefining itself to reflect the current trends and to keep up with the future - technology and innovation, alternate pedagogical thinking, maker movement and adherence to Sustainable Development Goals delivered in a student centric approach and in a humanistic way.

The WHY Philosophy

"We ask questions, and we encourage students to ask questions because it allows us to search for answers." Questions open up opportunities for students to learn something new each step of the way.

The WE-CAN-DO-IT Mentality

"We are Brihaspatians. We can do it!." The spirit of BVS student is guided by their bond and pride of being a BVS student and understanding their ability to achieve.

Café Style Learning with lots of Project Work

Real learning stems from nurturing curiosity and fearlessness. To facilitate it, we create an atmosphere that is warm, friendly and supportive to children. Ours is an unconventional class in which the teacher doesn't dominate nor is there only teaching from the board or books alone. Students mostly sit in groups like in a café. They are challenged with situations in groups and individually to which they approach originally at their pace. Learning just happens from each other and not just from the teacher.

The teacher activates these learning situations and offers support in a friendly manner, though.

Our teachers are not authority-wielding figures for children but friendly mentors and guides who ensure that the classroom is an emotionally safe place where individuals can dig deeper and take risks with their imagination and blossom without any fear.

Innovation Lab (STEM) along with Science Labs, Library and Computer Lab

We've got all the conventional facilities such as Physics and Chemistry Labs, Well Stock Library and Computer Lab. For those who want to dirty their hands while using logic, we have a special center called Innovation Lab. With or without much of prior knowledge in Science/Engineering, one can observe or make things here. Learning by doing becomes so much of fun.

Retail Business Lab along with Clubs, Events and Tours

We are well aware that late teenagers need lots of activities and spaces to add fun element to learning. While learning itself is done in a fun way full of varieties at BVS, Sports Clubs, Music/ Dance Clubs are there to help develop talents in wider aspects. Multiple events and trips not only break the monotony of studies, but assist greatly in developing tremendous qualities in individuals.

What is special for the first time in Nepal is a set-up of Retail Business Lab. We have partnered with Sukalpa International Pvt Ltd, a training and consulting company having trained more than 10,000 people on different employability and leadership skills sets. The retail lab comprises a mini pharmacy and grocery center in which students can do their practical sales, retail management, marketing, customer service, communication etc skills in the real business setting.

Career Placement

We are clear that +2 is only the beginning of a career. After +2, there are hundreds of options, and though students are relatively mature at this stage, the decision to choose a career path that is going to work best for them is highly confusing. In order to help +2 graduates make a wise decision for their support, we have established a guidance counseling section.

From the Academic Director's Desk

Dear prospective students and parents,

Our school has a mission statement that we explore the potential of individual students and promote excellence in all walks of life. With its history of well over thirty years and ground-breaking strategies into the future, we represent excellence in all aspects of our operation.

When I assessed the situation of our +2 program at BVS, I found that we need to bring in some life and variety to the program so that students have a greater exposure, more fun and a higher level of career focus. What we have achieved so far and what we plan ahead complement the fact that your experience at BVS will be highly rewarding, full of fun and probably even life-changing.

Our students remain at the center of everything we do in order to enable them to achieve the best future they deserve. I am excited to welcome a great batch while ensure that the BVS team is committed to realizing its mission.

Sincerely,

Kumar Thapa

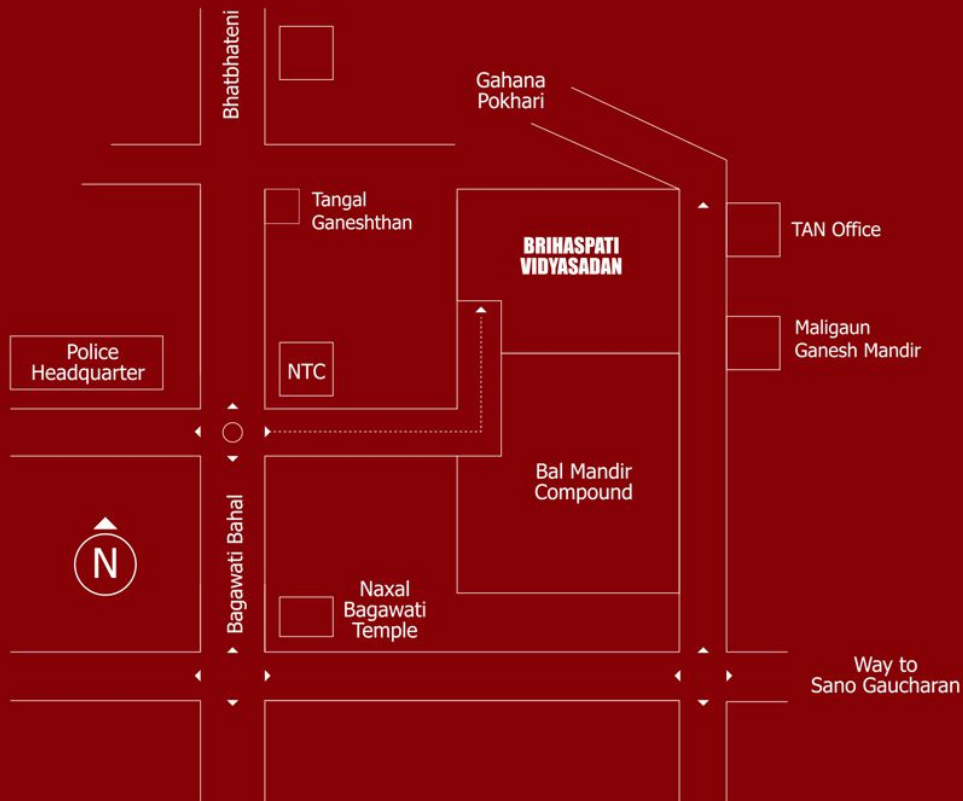

Great Team with Continuous Development

Teachers have had professional development to broaden the ways they extend and challenge students' learning. They have continued to strengthen their reflective practices. BVS is now forming a training cell within its compounds to provide better training resources for teacher upliftment.

With the shift in thoughts to "Water and Behavior fall from top down", BVS is hoping to come up with a strategic comprehensive teacher and staff upliftment program that will uplift the overall education experience of the school. For this, Mr. Kumar Thapa (Ex- Principal of John Dewey School) has come in as Academic Director.
