

## **IEC INTERIO SCHEMA**

### **INTERIOR EXHIBITION**

**INTERIO SCHEMA** is the series of Interior Exhibition where conceptual models designed by graduating students of IEC College of Art & Fashion are showcased. The event is being held since 2009 by and for the graduating students of IEC College of Art & Fashion. The exhibition is a part of the University requirement. Although it carries a practical remark, however, that is not the only motive of students to carry out this show - the exhibition will also promote local and upcoming interior designers among the big corporate society to help build their careers and in return improve the scenario of Interior Design in Nepal.

Moreover, influential and reputed media personalities are invited in every sequel of the exhibition to reach out to the larger audience and help people understand the importance and functionality of interior design in our daily lives. As this study field is new in Nepal, IEC College is providing a great platform to boost the younger generation who are creative, innovative and are looking for a prospective career in this lucrative field of interior designing.

The gist of this interior design exhibition event is to bring awareness and recognition opportunity to novice interior designers from IEC among various businesses sectors for future job recommendations in this field. Last year, the event was held on Royal Boutique Hotel, before that it was on Hotel Radisson. Our next sequel – the 9<sup>th</sup> series of interio schema is going to be conducted soon.
