Our Strengths: Education System:

Our classroom teaching involves conceptual and peer learning, group discussion, brainstorming and use of analytical questions. We use different pedagogy tools like power point presentation, animation and virtual lab for modern quality teaching. Apart from teaching and laboratory work, we put efforts to develop our students as globally competent health professionals by organizing seminars and workshops. In addition, SMS has a scheduled power point presentation by students in group/ individual from 2nd year onwards.

Various specialized hospital pharmacies and laboratories, urban and rural communities, pharmaceutical companies, retail pharmacies and reference laboratories are the areas where the students will be frequently exposed to gain practical skills and knowledge under the close supervision of highly qualified and skilled manpower. We believe in practical based learning system.

Laboratories

The laboratories are spacious, well furnished with necessary materials and equipments and are manned by dedicated, highly experienced faculty members and lab technicians.

Library

Students and faculty member can take full advantage of well stocked library, which has a good and wide selection of text books, reference books, magazines, articles; and Nepali and English daily news papers.

Pre-entrance classes

We also provide preparatory classes to those who are interested in pursuing any of the programs offered in our college.

Field Practice

Curriculum based field practices, industrial and hospital visit, bench research works, visits to PHC and drug regulatory bodies are frequently organized to upgrade the professional knowledge of the students.
