# Patron's Message

Dear all,

We have begun a great campaign with a goal to explore a new dimension of education in Nepal. Education should make new generation responsible for social transformation.

It's the duty of education to bring back the derailed youth into the right track and involve them in the welfare of nation. For this great cause, we have therefore focused at imparting consciousness and etiquette in the youth that is to lead the nation tomorrow.

**Prof. Keshab Subedi**

## Jubilant View

Established in 2064 B.S. with the aim of "exploring the future ...", Jubilant College is under the managerial team of highly acknowledged academicians, young energetic and enthusiastic administrators. Strict in maintaining discipline, high moral and ethics the Jubilant Team is committed to provide quality education.

Establishment of Jubilant College is not a new venture for its promoters. They have almost three decades of successful involvement in Jubilant Higher Secondary School to their credit. The promoters of the college have one common interest – giving their best to the students.

Centrally located in Kalimati, Jubilant College has five ropanis of land with two well-built buildings. Students are taught in spacious and well-carpeted rooms by the renowned and experienced professors/lecturers. Not only in academics but the college is equally focused in Extra Curricular Activities. Students are taken to the excursions and tours and they are encouraged and supported to participate in all kind of sporting events. Our achievement in those is our identity.

Full of almost all the qualities of an ideal academic institution, Jubilant College can doubtlessly be the best pioneer for the students trying to explore their future.

## Chairman Message

I believe that teaching learning is the most beautiful job to be entitled with or to be associate with. I feel very much lucky to be the part of this sector. It's been more than 2 decades that I am in this field. Now, I realize that we should make a bold decision to bring change in this field.

Feel of patriotism should be embedded in the students feeling to check our young creative manpower from diverting to foreign countries from where they do not return. If the feel of patriotism is embedded in the students from the school level then the future skilled man power will start to think for country development from the childhood only.

New teaching learning style should be introduced like "Allied" type of education to all . In this education style students are treated as individual where each and every habit, nature and capability of student is studied. Students are then segregated in different group as per their capability. In today's world being literate is essential but not necessary that they have to study only. With these types of education students can glow in the field of their passion like sports, music etc.

Deep knowledge of the culture should be taught from the school level because if a child is nourished with good culture then only good citizen will be produced. Taking responsibilities of students means taking responsibility of the future. I believe a child should be nourished with good culture from the school level.

Lastly, I like to say that we should give education with knowledge of good culture by using modern teaching learning method. I again want to focus on modern teaching learning method like using all the five sense organs. So, I strongly support for value based education for our future generation.

To the students, I like to say "when choosing your educational path, it is important to ensure that you receive career-focused, first-rate education that will benefit your both present efforts and future career"

**Radhika Devi Dahal**  
Chairperson

You have the dreams; we have the ways to achieve them.

## Principal's Message

Dear Students,

Congratulations on passing SEE exam !

Now you have stepped into the wider field of education that gives a shape to your future. Whether you are in Nepal or abroad, you should choose a college that provides you the global standard education. We have planned all the curricular and extra-curricular activities to keep pace with the changing perspective of the today's world. We are extending our scope to the global market by standardizing our higher education.

We are highly appreciated for our intensive care of students' progress. All our programmes are designed with the principle of 'students-first'. We maintain the competitive environment in the class. We give regular tests and creative feedback for their extensive progress. They can grow with the renowned professors and experts. They are involved in various social and professional events to boost up their confidence. We provide them proper guidance to assessment and research works and enable them to benefit from the boundless opportunities of the modern world.

Also, students do not need to compromise with the service and facilities here: peaceful academic environment, well-stocked library, hygienic canteen and enough sports.

So, I believe, Jubilant College is the right place to build up your strength.

Rishi Neupane

## Co-ordinator's Message

Dear students and guardians,  
Welcome to Jubilant College!

We have prepared the entire setup to fit the requirement of the time.

The new generation has immense opportunities waiting for them. However, opportunities do not come alone; they come with challenges. And you need to have a strong capability to face the challenges and grab the opportunity.

Success of a person heavily depends on the education he/she acquires. So, choice of a right college is the choice of a right way to success. Only a good college can explore your inner talents. We are committed to groom the students individually. Our competent teachers, affluent facilities, smart services and prime location are the bases to our success.

We always try to associate education with life. Everything we learn should improve our life. We carefully watch whether our passouts are successful in their career or not. We are always aware whether the learning has enabled them to choose better career, occupy an admirable space in society and lead a happy life. So in addition to textual study, we conduct various seminars and conferences with visiting professors to prepare the students for global competition.

Surely, you have the dreams: we have the ways to achieve them.

**Kuber Dhungana**  
Coordinator

## Science HoD Message

Dear Students and Guardians  
Congratulations on your success in the Exam.

Apparently, a college has a great role in building a nation by producing skilled human resource. Society gains prosperity only with the educated people. Now, it is our major responsibility to provide education that brings required change in students. So, we feel proud to be a part of educators.

We have already achieved a great deal so far. Many of our students have already occupied the significant space in society- some of them are managers, some are entrepreneurs, some are bankers, doctors, engineers and so on. Yet, we have so much to go ahead.

Finally, I would like to offer my sincere thanks to our valued students, guardians, faculties and well-wishers who always encouraged and supported us to our effort.

Naresh Khanal

After SLC, I was really confused to choose a college for my +2 course. Luckily, I came to know about Jubilant College. I joined it immediately and with the help of our friendly and experienced teachers I achieved this position today. I really feel proud of being a student of Jubilant College. I would miss many things and I would not be so confident if I were not in this college.
